

INNOVATION ACADEMY'S **ALL STEM SPARK**

NOVEMBER 1ST, 2024

WHAT IS ALL SPARK?

Explore the future of transportation through a cross-curricular lens at "All STEM Spark." Students will delve into the challenges facing our world in engineering and IT, with hands-on learning and expert guidance in areas like rocketry, autonomous cars, electric vehicles (EVs) and even Transformers! They'll tackle the question, "**How can we research and re-envision the next generation of transportation?**" This dynamic day will spark curiosity and innovation, proving there's more than meets the eye at Innovation Academy.

INTERESTED IN VOLUNTEERING? LETS ROLL OUT!

We are particularly interested in learning about the challenges you see in the transportation sector. Your insights could greatly help our students as they work to build and code innovative solutions. Your involvement would not only provide real-world context to their learning but also inspire the next generation of problem solvers. We would love for you to host a workshop on this day bringing a problem you are/have experienced and work with our students to find a solution.

Please fill out the attached form or email
TaylorLS@fultonschools.org if you are interested in participating!
