

Pets are no doubt a fundamental part of many students' lives at Innovation Academy. However, when you have a pet count that exceeds single digits, it can be quite daunting. **Aiden Lincoln**, a student at Innovation Academy, has a total of 36 pets. Twenty-three of which are horses and 13 are cats. Aiden says, "People ask me a lot if horses are intelligent. My answer to that would be only when it's inconvenient for you." Aiden is not the only student here with a double-digit number of pets. Student **Claire Parry** is currently taking care of 20 chickens. We asked her if she had any favorites. "I have one favorite chicken named Marceline. She's my favorite because I hatched her and raised her. Chickens are fun to have because we get free eggs and we never have to throw away any food cause they just eat the leftovers!" Having a few pets may be a daunting task for many, but some students at Innovation Academy decided to take it to the next level by having more than 10!

*Two of Aiden's thirteen cats hanging out together*

*Marceline as a hatchling!*
